problem

The price of sweet corn is A It's a circle. A Is 100 It is a multiple of . However, the value added tax on sweet corn 10% The price includes B It became a circle.

Price including VAT B When given, the price excluding this A Let's find it.

input

Integer in first line B $(1\,100 \le B \le 9\,900)$ is given. B Is 11 is a multiple of .

output of power

Price excluding VAT on the first line A Prints out .

Example Input 1 copy

```
1100
```

Example Output 1 copy

```
1000
```

Example Input 2 copy

```
2970
```

Example Output 2 copy

```
2700
```

Example Input 3 copy

```
9900
```

Example Output 3 _{copy}

```
9000
```
